Conference Description

During the period of transport, critically ill neonates and children are at risk from disease, injury, and the transport itself. This risk can be minimized by good communication between the referring and receiving providers, careful evaluation and management, anticipation of complications, and a well-equipped and well-trained team. This two-day course provides a comprehensive approach to clinical issues related to neonatal and pediatric transport.

Keynote Speaker

Carolyn Jones, BS

Carolyn Jones is an award-winning photographer and filmmaker who specializes in telling stories that shed light on issues of global concern. From people "living positively" with AIDS to women artists supporting entire communities and nurses on the front lines of our healthcare system, Jones has devoted her career to celebrating invisible populations and breaking down barriers. Her most widely acclaimed book publications include *Living Proof: Courage in the Face of AIDS* and *The American Nurse*, which led to a feature documentary included

in the U.S. State Department's American Film Showcase. Her award-winning documentary *Defining Hope*, which was the culmination of a journey investigating how we can make better end-of-life choices, was broadcast on PBS stations nationwide. Jones' subsequent documentary *In Case of Emergency* focuses on our nation's biggest public health challenges—from COVID-19 to a lack of health insurance to the devastating impact of the opioid crisis. Her latest film, *American Delivery*, addresses solutions to the maternal mortality crisis in the United States, and recently won the Audience Award for Best Film at the Cleveland International Film Festival, where it premiered. Carolyn was inducted into the American Academy of Nursing as an honorary Fellow for her contributions to the nursing profession.

Life Flight Annual Memorial Speaker

Jeff Hirschi, DO

Dr. Jeff T. Hirschi, DO, is a Utah native with a passion for adventure and a dedication to saving lives. Before pursuing a career in medicine, Dr. Hirschi served as the Olympic Ski Race Patrol Director for the 2002 Winter Games. His background includes extensive experience in wilderness rescue as a mountaineering rescue patroller on Mt. McKinley at Denali National Park, a search and rescue commander, and a backcountry observer for the Utah Forest Service Avalanche Center.

Current Concepts in Neonatal and Pediatric Transport

February 20 – 21, 2025: Main Conference

February 19, 2025: Optional Pre-conference Sessions

Optional Session 1: Neonatal and Pediatric Procedure Labs (held at Primary Children's Eccles Outpatient)

Optional Session 2: Adult Transport Lectures (held at the Radisson Hotel)

Objectives

Upon completion, the participant will be able to:

- Discuss clinical care consistent with current guidelines of practice for specialty team transports
- Demonstrate assessment and stabilization skills for the care and management of critically ill patients
- Outline management options for specific clinical disease states
- Discuss limitations and effects of the transport environment

About Us

Intermountain Life Flight delivers specialty care throughout the United States to infants, children, and adults via jet, fixed wing, rotor wing, and ground ambulance. We are Utah's only dedicated pediatric transport team.
